

WELCOME TO OUR OFFICE

We are pleased that your dentist has referred you to Endodontic Associates of Marlboro and Worcester for your endodontic plan of health. Our friendly staff will strive to exceed your expectations by providing you with the highest quality endodontic treatment in a warm, caring environment. Our endodontists use the latest advancements in scientific technology and sterilization procedures to help you achieve the best possible result.

WHAT IS ENDODONTIC TREATMENT?

Root canal (endodontic) treatment is performed when the soft inner tissue of the tooth (the pulp) has been damaged, usually through decay or physical trauma. Treatment consists of removing the pulp and then cleaning, disinfecting, filling and sealing the root canals. Over 90% of cases are successful, while a few may require additional treatment. After root canal treatment has been completed, it is very important to return to your dentist so that a permanent restoration can be placed. A crown is often needed to protect the tooth.

THE CONSULTATION

A Clinical examination will be performed along with diagnostic testing and digital radiographic imaging (x-rays) to determine if endodontic treatment is needed. The consultation is also your time to meet the doctor and ask questions regarding your endodontic plan of health.

PAYMENT ARRANGMENTS

Our administrative professionals will be happy to assist you in maximizing your insurance benefits. As a courtesy, we will be happy to file a claim for you and provide you with an estimate of your initial payment responsibility. Your responsibility, which is due at time of treatment, can be paid by cash, check or major credit card. If you prefer a payment plan option, we participate with CareCredit. Pre-approval should be achieved by contacting CareCredit by phone or online before your initial appointment.

endodontic associates

MEET OUR DOCTOR

Dr. Yasmin Basseghi Basseghi is a graduate of Birmingham-Southern College where she earned her Bachelor of Science degree in Biology and Psychology in 2004. She then attended the Boston University Goldman School of Dental Medicine, where she obtained her Doctorate of Dental Medicine degree

in 2009. Following graduation, she completed one year of post-graduate training in general dentistry at Boston University. Dr. Basseghi completed her specialty training in Endodontics at Boston University in 2012. Dr Basseghi is an active member of the American Association of Endodontists and an Assistant Professor in the Department of Endodontics at Tufts University School of Dental Medicine. She is dedicated to providing patients with high-quality and comprehensive endodontic care while keeping patients comfortable and at ease. In her spare time, she enjoys traveling, music, and spending time with her family.
