

INSURANCE ESTIMATES EXPLAINED

After your dentist recommends treatment, our team will be happy to estimate your out of pocket expense based on what your insurance will likely pay. We will always submit claims to your insurance company for your treatment, however, we cannot guarantee the amount of the insurance payment.

Stay Informed: Review Your Dental Plan for Benefits and Coverage Details.

Here Are a Few Things to Keep in Mind:

Your dentist will recommend treatment based on what you need to keep your mouth healthy. This won't always align with what insurance will cover.

Dental insurance rarely covers 100% of the services provided.

Similar to medical insurance, the patient is responsible for any uncovered portion of the fee for treatment.

DISCLAIMER: Any estimate provided by our office is considered a guideline until the final insurance payment. Our office can make no guarantee of the insurance payment as estimated.
