You are scheduled for a series of non-invasive treatments with the Emsculpt. The device is indicated for improvement of abdominal tone and strengthening of the abdominal muscles same as for strengthening, toning and firming of buttocks. Initials: _____

Your treatment provider will discuss your specific treatment needs. Recommended number of treatments is 4. The treatment is typically about 30 minutes per session, with sessions separated by at least 2 days, depending on your needs. Completing a full treatment series is necessary to maximize treatment efficacy. You may need additional treatments depending on your condition. Initials: _____

Prior to the treatment you are not required to do anything special. On the day of the treatment, you are advised to wear comfortable clothing which allows flexibility for correct positioning during the treatment. You will be asked to remove all jewelry and electronic devices. Initials: _____

I acknowledge that successful treatment outcome can be affected by smoking or excessive alcohol consumption, as well as: eating disorders or on-going medication. While no special diet is required, you are encouraged to eat healthy to help promote and maintain results. Initials: _____

There is typically no pain associated with your treatment and there is no anesthetic required. During the application you will feel intense, yet not painful contractions in the treated area. The procedure doesn’t require any recovery time. Typically, you can get back to your daily routine right after the treatment. Initials: _____
