

Oasis wound matrix

- Follow-up every other week for new placement of wound matrix for approximately 6 consecutive weeks
- Leave dressing/bandages in place and keep them clean and dry. They will be removed at your next office visit the following week.
- If a dressing change is necessary, then remove dressing consisting of gauze and non-stick layer (such as adaptic), leaving steri-strips in place. Re-apply non-stick layer (adaptic), dry gauze, and then wrap or tape to secure dressing. Do not remove anything under the non stick bandage

Apligraf

- Follow-up weekly after surgery with either a home health nurse or wound care nurse
- On the third week post-op make an office appointment for assessment of wound
- You may need a 2nd and 3rd application of this dermal graft every 2-3 months

Integra

- Follow-up weekly after surgery for dressing changes by either home health nurse or wound care nurse
- On the third week post-op make an office appointment for assessment of wound
