

Description of treatment:

This treatment involves the collection of your blood (approximately 8 - 16ml), then your blood is spun down using a centrifuge to separate out the plasma and platelet portion using the separator gel' as a special filter. The PRP portion of your blood is then injected back into your skin to stimulate new collagen production, and to re-energise your cells into rejuvenating themselves. The product injected is 100% your own blood by-product (autologous).

Contraindications:

You should not have PRP treatment done if you have any of the following conditions:

Skin conditions and diseases including: Facial cancer, past and present. This includes SCC, BCC and melanoma, systemic cancer, chemotherapy, steroid therapy, dermatological diseases affecting the face (i.e. Porphyria), Blood disorders and platelet abnormalities, Anticoagulation therapy (i.e.: Warfarin) .

Please advise your treatment provider if you suffer from, or suspect you suffer from, any of the following conditions: Platelet dysfunction syndrome, critical thrombocytopenia, hypofibrinogenaemia, hemodynamic instability, sepsis, chronic liver disease, Hepatitis or any acute or chronic infections. Please advise your treatment provider if you are you currently taking any of the following medications: Aspirin, Anti-inflammatory such as Nurofen, Votaren, Diclofenac, or Naproxen, St Johns Wort, Garlic.

Please advise your treatment provider if are you currently taking, or have you recently taken (within 14 days) Vitamin E, or Fish Oil supplements that could have a thinning effect on your blood.

Side Effects:

You will likely experience mild to moderate swelling of the treated area, this will last for about 12- 24 hours; ice or cold compresses can be applied to reduce swelling if required. You may notice a tingling sensation while the cells are being activated. In rare cases skin infection may occur, which is easily treated with an anti-biotic

Client Consent:

I understand that due to the natural variation in quality of Platelet rich plasma, results will vary between individuals.

I understand that although I may see a change after my first treatment; I may require a series of up to 6 sessions to obtain my desired outcome.

The procedure and side effects has been explained to me including alternative methods; as have the advantages and disadvantages.

I am advised that though good results are expected, the possibility and nature of complications cannot be accurately anticipated and that, therefore, there can be no guarantee as expressed or implied either as to the success or other result of the treatment.

I am aware that the PRP treatment is not permanent as natural degradation will occur over time.

INFORMED CONSENT:
PLATELET-RICH PLASMA
SKIN TREATMENTS

I authorize Dr. Nuveen and/or qualified staff members to perform the injection of PRP (Platelet Rich Plasma) for rejuvenation.
