

Dr. David L. Mobley

One of America's top plastic surgeons.

Dr. David Mobley continually stays on top of the latest plastic surgery advancements.

"THE KEY TO GOOD PLASTIC surgery, says Dr. David L. Mobley, "is dramatic improvement with a natural appearance." He's achieved that goal many times over, being rated as one of the America's Top Doctors for plastic surgery by Castle Connolly four years in a row.

With 15 years' experience, Dr. Mobley consistently updates his capabilities with innovative techniques. Among them is the Fractional CO2 Laser used in the group practice at Sarasota Plastic Surgery Center. "We've used lasers for years, but this version can achieve amazing results, especially when combined with facelift surgery. We can rejuvenate the face and treat wrinkles, sun damage and tighten skin, all with faster recovery."

Dr. Mobley is now offering a less invasive facelift that decreases healing time but still gives dramatic long-lasting improvements similar to a traditional facelift. But not all "mini-lifts" are the same,

he notes. "There's a disturbing trend as doctors who aren't plastic surgeons advertise 'mini-lifts' because that's all they can do. Patients need to check credentials to ensure they are with an experienced, board certified plastic surgeon."

Dr. Mobley is board certified by the American Board of Plastic Surgery, the American Board of Facial Plastic and Reconstructive Surgery, and the American Board of Otolaryngology. His expertise inspires confidence in surgery and post-operative care. And he works to understand exactly what each patient wants to achieve, offering them a range of options in order to help determine what procedure will best achieve the results they want.

Ultimately, those results are where his experience and training shows. "I want to ensure dramatic results that don't shout 'facelift' but appear naturally attractive and youthful."

David L. Mobley, M.D.
