

Dr. David L. Mobley

One of America's top plastic surgeons.

"The key to good plastic surgery," says Dr. David L. Mobley, "is a dramatic improvement with a natural appearance." Dr. Mobley has achieved that goal many times over, and has been rated as one of America's Top Doctors for plastic surgery by Castle Connolly three years in a row.

Dr. Mobley is known for his attentive care and communication with patients. He is dedicated to understanding exactly what the patient wants to achieve. "The patient knows the result they want, so I listen, discuss options and advise them," he says. "Together we set expectations at an appropriate level and I deliver those results."

Plus, with 14 years experience, Dr. Mobley consistently updates his capabilities with innovative techniques. Among them is the newest laser technology, the fractional CO2 laser, recently added at Sarasota Plastic Surgery Center.

"We've used lasers for years, but this newest version lets us achieve amazing results, especially when added to facelift surgery," says Dr. Mobley. "We can rejuvenate the face and treat wrinkles, sun damage and tighten the skin—all at the same time. We can even treat the neck and chest area now, because this system is milder than traditional lasers. Recovery time is much faster as well—one week instead of three."

Dr. Mobley is board certified by the American Board of Plastic Surgery, the American Board of Facial Plastic and Reconstructive Surgery and the American Board of Otolaryngology. His expertise inspires confidence, as does his careful consideration of each patient's needs, spending time on consultations and postoperative care.

"A patient is an individual," he says, "each with special needs. I want to ensure dramatic results that don't shout 'facelift' but appear naturally attractive and youthful."
