Surgery

*Beautiful, natural results and patient satisfaction
are Dr. David Mobley's ultimate goals.*

SUCCESSFUL PLASTIC SURGERY

combines artistry, surgical expertise and experience. Dr. David L. Mobley of Sarasota Plastic Surgery Center also believes that patient communication is essential. "Excellent communication helps educate the patient," he says, "in order to ensure realistic expectations for an attractive, younger appearance that looks natural."

Dr. Mobley's skill has earned recognition for a fifth straight year as one of America's Top Doctors for plastic surgery. With more than 16 years of experience, Dr. Mobley consistently updates his capabilities with innovative techniques such as less-invasive mini-facelifts, rapidly healing fractional laser, plus new fat grafting and stem cell methods. "These are exciting times in plastic surgery with increased options for our patients," he says. "Combining new techniques with the classics, such as a mini-lift or facelift, provides the best results we have ever seen."

To ensure patient comfort and convenience, Sarasota Plastic Surgery Center features a state-licensed and federally certified ambulatory surgery

center dedicated solely to plastic surgery, as well as a modern medical spa.

Dr. Mobley is certified by the American Board of Plastic Surgery and a member of the prestigious American Society of

"Combining new techniques with the classics provides the best results we have ever seen." Aesthetic Plastic Surgery. His practice focuses on cosmetic surgery of the face, breast and body including facelifts, mini-lifts, breast

enlargement, liposuction and tummy tucks.

He discusses the latest techniques, offers advice, and will even answer individual questions online at his website, sarasotaplasticsurgery.com, and its associated Facebook page and blog.

"We want to be the go-to source for information, education and, of course, plastic surgery for the Sarasota area," he says. "There's nothing more rewarding than helping people feel better about themselves."

Surgery

*With more than 20 years of
experience, Dr. James Schmidt has
been named one of America's Top
Doctors seven times.*

"PEOPLE WANT A NATURAL surgical result with minimal down time," says Dr. James H. Schmidt. "My objective is to make the patient look better without shouting 'plastic surgery' to the world." For more than 20 years, Dr. Schmidt has achieved that objective, and in 2011 he was again named one of America's Top Doctors for plastic surgery—the seventh time so honored.

Dr. Schmidt specializes in cosmetic surgery of the face and body including facelifts, less invasive mini-lifts, advanced laser procedures, and breast and body procedures such as tummy tucks and liposuction.

"The newer laser technologies let us correct wrinkles, discoloration and skin texture with much shorter recovery time—often days rather than weeks," he says. Nonsurgical tissue fillers such as Restylane and Juvaderm, anti-wrinkle agents such as Botox Cosmetic and Dysport, and fat grafting all help reduce and fill in lines. "During the consultation, I listen to the patient's desires and concerns, then recommend the best procedure or combination to achieve their goals," says Dr. Schmidt.

His practice at the Sarasota Plastic Surgery Center includes state-of-the-art equipment and technologies, experienced staff and a licensed outpatient surgery

"My objective is to make the patient look better without shouting 'plastic surgery' to the world." center dedicated solely to plastic surgery. Also included is a medical spa for additional cosmetic procedures staffed by a licensed aesthetician and a physician's assistant.

Dr. Schmidt is board certified by the American Board of Plastic surgery and a Fellow in the American College of Surgeons. He belongs to the American Society of Plastic Surgeons, the American Society for Aesthetic Plastic Surgery, and is a co-clinical assistant professor in the Department of Surgery at the University of Florida. Those credentials and training help create beautiful results—naturally.
