Peels

All chemical peels performed in our office use medical grade products from SkinMedica. Each treatment is customized to your particular skin type. The goal of each peel is to reduce the appearance of fine lines and wrinkles, sun damage and pigment irregularities. Depending on the peel that is chosen, there may be little or no visible peeling and little or no downtime. Each peel can be purchased individually or as a series for optimal results.

Illuminize Peel.....\$100

This is our lightest, most superficial peel and great for first timers. This peel will provide an instant enhancement of the skin's appearance, immediately brightening and refreshes the skin. There is usually little or no visible peeling and no downtime. This is great for glowing skin before a special event, wedding or party and can be performed every 2 weeks.

Vitalize Peel.....\$150

This is a mild to moderate peel designed to improve moderate sun damage, fine lines and wrinkles, acne and acne scarring, and melasma. This peel produces predictable and noticeable results with 2-5 days of mild peeling and minimal downtime. We recommend a series of 3-6 peels, done every 3-4 weeks, to see the best possible results.

Rejuvenize Peel.....\$225

This is our strongest peel and is indicated for more severe skin imperfections requiring greater clinical treatment. This peel will produce compelling results with moderate peeling lasting 2-5 days and minimal downtime. We recommend a series of 3-6 peels, done every 4-6 weeks, to see the best possible results.

Probiotic Youth Boost.....\$75

This mild peel uses a combination of dermaplaning and probiotics to treat fine lines and sun damage. The results are immediate, creating healthy looking skin with smaller pores and a lustrous glow. This peel usually results in minor visible peeling and little to no downtime.
