

Crystalens Lifestyle Questionnaire

Decreasing vision, especially at near and intermediate distances can cause a tangible effect on your daily life. Wearing glasses or contacts is intended to give you the best possible vision but many people have difficulty wearing glasses during activity, suffer from dry eyes and cannot tolerate wearing contacts, or do not easily adjust to trifocals. To help us evaluate your level of visual functioning and understand how wearing vision correction (glasses and/or contacts) can have an effect on your lifestyle, please answer yes or no to the following questions.
