

The Facts about Aging

Age. Genetics. Diet. Stress. Environment. Sun.
Over time, these factors contribute to the visible signs of aging. They include the appearance of fine lines, wrinkles, dullness, uneven skin tone and the loss of natural hydration.

ZO[®] anti-aging solutions are formulated to prevent and correct aging at every phase. They address both the visible signs of aging and the key triggers that can lead to premature aging.

WHAT WE SEE ON OUR SKIN

WHAT'S HAPPENING TO OUR SKIN

PHASE I *Generally for ages between 17 - 25*

| | |
|--------------------------|-------------------------|
| Early fine lines | Slow skin renewal |
| Dullness and dehydration | Reduced hydration |
| Enlarged pores | High oil gland activity |

PHASE II *Generally for ages between 26 - 44*

| | |
|--|--|
| Fine lines and early signs of wrinkles | Reduction in collagen and elastin production |
| Early signs of sagging near eyes | Moderate drop in hydration production |
| Uneven skin tone | Uneven pigment distribution |

PHASE III *Generally for ages 45 and above*

| | |
|--|--|
| Rough texture | Lack of cell turnover and natural exfoliation |
| Excessive sagging near eyes, abundance of fine lines and wrinkles, dehydration | Significant reduction in collagen and natural hydration production |
| Excessive uneven skin tone and age spots | Severe uneven pigment distribution |

Our anti-aging solutions promote continuous skin renewal, creating and maintaining healthy skin for life.

Stimulate

cellular function and healthy skin renewal

Reduce

fine lines and wrinkles

Maintain

youthful-looking complexion

OSSEENTIAL® ADVANCED RADICAL NIGHT REPAIR*

60 mL / 2 Fl. Oz.

Part of Phase III: Aggressive Anti-Aging Program

Enhance

skin texture and appearance

Increase

skin firmness and density

Restore

a more even skin tone

This formula contains retinol, antioxidants and specialized DNA-repairing enzymes. They work around the clock to help minimize UV oxidative damage, restore skin function, increase elasticity and provide a more even skin tone. The formulation's superior peptide complex works synergistically to stimulate collagen while helping to diminish fine lines and wrinkles. It also helps firm and tighten the skin.

This lightweight formula features two growth factors that support collagen and elastin production for increased skin density. Additionally, a combination of retinol and amino acids stimulates cellular function, reduces collagen degradation and restores elasticity. Plus, antioxidants protect against free radical damage, helping to prevent future signs of aging.

This unique formula is designed to deliver rapid results to address the multiple signs of skin aging. It uses a patented microdelivery system to provide a slow release of high-potency retinol to maximize anti-aging benefits and minimize irritation. It also improves rough texture, reduces brown spots for a more even skin tone and helps to diminish fine lines and wrinkles.

PHASE I: DAILY SKINCARE PROGRAM

- Helps preserve and maintain a more youthful-looking complexion
- Helps prevent future damage by protecting skin from the sun
- Helps promote a more even skin tone and create finer pores
- Keeps skin hydrated

PHASE II: ANTI-AGING PROGRAM

- Helps reduce the appearance of fine lines and wrinkles
- Helps promote a more even skin tone and create finer pores
- Preserves and maintains a more youthful-looking complexion
- Helps prevent future skin damage by protecting against the harmful effects of the sun

PHASE III: AGGRESSIVE ANTI-AGING PROGRAM

- Helps reduce the appearance of deep lines and wrinkles
- Minimizes the appearance of hyperpigmentation and age spots
- Promotes a more even skin tone
- Aids in strengthening the skin by keeping hydration at the proper level

* Using a high concentration of retinol sequestered in a patented, slow-release micro delivery system, this unique formula is designed to deliver rapid results to address multiple signs of skin aging. The high-potency ingredients deliver a dramatic reduction of fine lines and wrinkles. They also increase firmness and density and produce skin that is more supple and elastic. Redness and peeling may occur as the damaged skin is being repaired and new, healthy, underlying skin cells emerge to the surface for a more even-toned, smoother texture and radiant skin appearance.
