

Dr. David L. Mobley

Sarasota Plastic Surgery Center.

Dr. David L. Mobley is one of America's top plastic surgeons.

DR. DAVID L. MOBLEY of Sarasota Plastic Surgery Center has spent more than 17 years in his specialty and has earned recognition as one of Castle Connolly's Top Doctors in plastic surgery for the sixth straight year. His successful practice combines artistry with surgical expertise, which is consistently updated with new technology, including less invasive mini-facelifts, rapidly healing fractional laser, plus fat grafting, and stem cell methods.

"Combining new techniques with the classics, such as a mini-lift or facelift, provides the best results we've ever seen," he says. "These innovations have greatly increased the popularity of plastic surgery procedures."

Popularity, however, is a mixed blessing and can cause confusion for patients. "We've seen a massive increase in marketing for mini-facelifts and so-called 'breakthrough procedures,'" Dr. Mobley explains, "but many of these are advertised by those who are simply jumping into the field. Even if

they are doctors or dentists, they are not necessarily board-certified plastic surgeons."

For safety and the most effective results, Dr. Mobley advises anyone who is considering a plastic surgery procedure to investigate and ensure that they select

"Combining new techniques with the classics provides the best results."

a board-certified plastic surgeon through the American Board of Medical Specialties.

His practice focuses on plastic surgery of the face, breast and body including facelifts, mini-lifts, eyelid surgery, fractional laser, breast enlargement, liposuction and tummy tucks. Sarasota Plastic Surgery Center includes a state-licensed and federally certified ambulatory surgery center dedicated to plastic surgery as well as a complete medical spa, staffed by a licensed aesthetician and physician's assistant.
