

Q&A

with **DR. JEFF WELLER**
of WELLER AESTHETIC &
IMPLANT DENTAL CARE

“Life is good and it gives me pleasure to help others feel that way too, with a smile.”

Q: What are some new and innovative treatments your practice offers?

A: Cosmetic dental implants are one of the greatest new procedures available today. Utilizing custom designed attachments we can replace one tooth or multiple teeth to make them feel and look exactly like natural teeth.

Q: What is your area of expertise?

A: I have been practicing dentistry for 24 years with a focus on cosmetic and full mouth rehabilitation. I have had specialized training at NYU in cosmetic dentistry, which has given me an advantage over most dentists in creating beautiful, natural looking smiles. Dental implants, as I mentioned, are also an area that I remain extensively involved in. Utilizing dental implants has helped rebuild many of our cosmetic and full mouth rehabilitation cases.

Q: Describe your typical day at work.

A: I have a blast creating smiles and rebuilding mouths 75 to 80% of my day. The balance of my time is spent educating my patients, as well as taking care of other patients that appreciate a dentist that takes a comprehensive approach to their general dental needs.

Q: Why should patients young and old seek you as their dentist?

A: Well my typical day as you can see is about restoring a patient's mouth to optimal condition and in doing this I try to find out how patients ended up in the conditions that brought them to my office in the first place. I can provide young people with conservative treatments which will help them prolong the life of their teeth and restorations, so they do not end up destroying their teeth. In regards to older patients, in today's society too

many dental professionals are not offering optimal care or treatment thinking they will not invest in themselves. Today everyone is living longer and teeth are critical to one's health and beauty.

Q: What kind of experience does a patient have at your practice?

A: A patient's experience in my office is comfortable, relaxing and all about them. They have an opportunity to meet the staff, and discuss their wants and desires as we evaluate their dental health and needs. They will experience 5 star service that is comprehensive in nature including digital photography and digital radiographs, with a lot of listening involved.

Q: What sets your practice apart from others in the Chicago land area?

A: The number one thing would be the detail that goes into every case. This starts by listening to the patient's wants, and setting up a patient's proper expectations. We then look at the health and function of one's mouth in order to make the proper recommendations. Every detail goes into the design aesthetically

and functionally to complete each patient's dream smile. The patient is very involved. The end result is natural, beautiful, comfortable, and long lasting.

Q: Any unique features at your practice?

A: My staff is fabulous. Everyone that works in my office must make the commitment to excellence. I have an advantage- my sister Jamie has been my office manager for over 12 years and my wife Tina is our head treatment coordinator. They both have a special commitment to me and my patients. They are here to help make everyone feel great about the dentist and make their experiences in our office timely, efficient, and enjoyable.

Q: What are your key strengths?

A: When it comes to a smile I am very creative, which is necessary to develop complex cosmetic cases or even simple cosmetic fixes. I am also committed to continuing education, I want to be able to offer any and all advancements in dentistry today and be in the forefront of modern dental techniques. I am a perfectionist as well, so I give 100% to making each smile be the best it can be.

“Beauty is power;
a smile is its sword.”

—Charles Reade

Q: What is the most rewarding part of your job?

A: I make people SMILE. I have patients that come from all walks of life with dental problems that they have lived with, neglected, and even sometimes conditions that are caused by other dental professionals. They come to me seeking my expertise. I am able to help them, offer different options, educate them, and most of all make them smile and feel confident again. Life is good and it gives me pleasure to help others feel that way too, with a smile.
